

Steam cleaning mixture

Get Clean Surface Cleaning guide:

Carpet Sport Remover - Nature Bright. 1 scoop and 16 oz water. Squeeze out extra liquid before treating stains and use only enough solution to saturate. Wait 1-5 minutes. Blot with a white towel. Repeat if needed. Rinse well, let dry, and then vacuum.

From Bobs Files:

Shaklee Get Clean Carpet Cleaner: Using a steam cleaner or rug cleaner (like those rented from a store). Pre-spot major stains or spots with **Nature Bright** beforehand, then scrub them lightly after they've soaked for a minute.

In Steam Cleaner, add the hot water first, and then add:

2 ounces of Basic-H2 and

1 tbsp. of Nature Bright and clean away!

Note: If interested in disinfecting your carpet add **1 oz. of Basic-G** and Laundry (powder or liquid) in place of H2.

Note: Do not use Basic-H2 if your carpet has a stain guard on it as H2 can remove the guard. Instead use the Shaklee Fresh Laundry Powder or Liquid. Basic-H2 eliminates the germicide in Basic-G, so they do not need to be used together.

OR:

" I own a steam vac carpet machine and I use laundry products in the detergent tank.

My detergent tank then mixes with a big plain water tank.

*I use an **ounce of liquid laundry, 2 tbs nature bright, and a few drops of softener to about 6 oz of hot water.** My mixture does a great job and the carpet smells wonderful and feels soft when it dries."*

Between raising teenagers and dogs and cats, our family room carpet - light beige, was not looking so great. First I pre spotted the really bad spots - I used the all-purpose to scrub.

Next, using my carpet shampooer (starts off with hot water, and then the temp cools off) I did the whole carpet in Germicide. I really needed that, for me!

Next I used the laundry soap and nature bright and softer than soft and just cleaned, and cleaned. The carpet came out great! Robin Forster
